

Selecting a Bed Type in Mstat

In preparation for the September 18th HAvBED bed poll, please make sure your facility's bed type selections are correct to provide an accurate report. This short guide will give you step-by-step instructions for this procedure.

Navigating to Bed Types in Mstat

After logging in to the ESF 8 Portal, open Mstat in the single sign-on section of the Portal home page. Once your page opens in Mstat for your facility, look at the bottom left of the screen under "Quick Links" for Bedtype Mapping. Click the "Manage" button.

The screenshot shows the Mstat web application interface. At the top, there's a navigation bar with 'Admin', 'Dashboard', 'Patient', and 'Data Cell' links. Below this is a header section with a message: 'There is no current active event. Please continue normal reporting requirements'. The main content area is divided into several sections. On the left, under 'Quick links', there's a 'Bedtype Mapping' section with a 'Last Update at 6/16/2013 at 9:07:13 AM' and a 'Manage' button. A red arrow points to this 'Manage' button, and a black box with the text 'Click "Manage"' is positioned above it. To the right of 'Bedtype Mapping' are 'Manage Generators' and 'Utility Providers' sections, each with a 'Last Update at' field and a 'Manage' button. Above these sections are 'Statuses', 'Census', and 'Utility Status' sections, each with a 'Last Update at' field and 'No Change'/'Change' buttons. The 'Statuses' section includes 'Operating Status', 'Evacuation Status', 'Power Status', and 'Fuel Status', all showing '-N/A-'. The 'Census' and 'Utility Status' sections also show '-N/A-'. The 'Manage Generators' and 'Utility Providers' sections show 'Last Update at' fields.

Managing Bed Types: Adding a Bed Type

From this screen, you can activate and de-activate bed types.

1. To add a bed type, in the left column, highlight the bed type you want to add.
2. Click the ">" button in the middle.

That's it! Your new bed type will appear in your bed poll views in both Resource Management and Mstat.

You can click the "Back" button to return to the Mstat main page.

Managing Bed Types: Deleting a Bed Type

From this same screen, you can remove a bed type from your bed poll view.

1. To remove a bed type, in the right column, highlight the bed type you want to remove.
2. Click the "<" button in the middle.

That's it! Your new bed type will be removed from your bed poll views in both Resource Management and Mstat.

Again, click the "Back" button to return to the Mstat main page.

Conclusion

Managing bed types is an important function to ensure that Louisiana provides accurate data during the HAvBED polling events. You should periodically review your facility's bed types to ensure they represent an accurate picture of your facility's capabilities.

If you need any help in completing these procedure, reach out to your DRC or send an email to esf8help@la.gov.

Thanks for your attention and patience!
